## **LSCM Logistics Summit 2025**

*Port Community System:  
Steering Innovation and Collaboration in Logistics*

### **Introduction**

The logistics industry is currently navigating a transformative period, facing both challenges and exciting opportunities. With global supply chains impacted by geographical tensions and evolving consumer demands, the expectation for flexibility and traceability is stronger than ever. At the same time, advancements in technology, including AI, machine learning, IoT, data analytics and blockchain, are shaping the industry, allowing companies to improve efficiency and responsiveness. This evolving landscape encourages innovative solutions and collaborative approaches, paving the way for a more sustainable future in logistics.

This year's Summit will focus on the pivotal theme of Port Community System (PCS) development, an essential component in enhancing our logistics infrastructure and meeting the demands of ever-evolving global market. Keynote speakers will share their insights on how smart port initiatives can offer efficiency, sustainability, and competitiveness in the industry.

### **Event details**

Date: 10 October 2025 (Friday)  
Time: 9:00am – 4:30pm  
Format: Conference & Exhibition  
Venue: Grand Hall and Function Hall, Hong Kong Science Park

### **Highlights of LSCM Logistics Summit**

As a premier gathering of industry leaders, innovators, and experts dedicated to shaping the future of logistics in Hong Kong. The Summit presents a valuable opportunity for participants to share perspectives on the development of the logistics industry in a digital era.

- ◆ Heavyweights from the government, industries and academia to share valuable insights on smart port development and industry updates
- ◆ Distinguished guests from different industries to exchange views and experience
- ◆ Informative exhibition with technology showcases and demonstration by LSCM
- ◆ Excellent networking opportunities to form collaboration
